

FEATURES

The model comes supplied with a single tool holster attached making it an ideal combination

Ergonomically optimised design providing quick tool holstering and fast tool draw

Designed with single deep pocket suitable for a wide range of small hand tools

Holster will accommodate and fit onto standard (50mm) width existing universal tool belts

Features a single anchorage point rated to 5kgs (Dynamically tested - see 'testing pages' for more info). Rating using a 2:1 safety factor

Combined with the Cobra MKII retractable reel, is designed to prevent falling tools and objects

Optimised (swivel) to prevent twisting with intense usage in applications such as scaffolding etc

The Cobra MKII is uniquely developed with a smooth cable pull and retraction action, resulting in a motion without snatching and locking which inferior models suffer from, making them painful to work with. Not all reels are the same.

The Cobra MKII lanyard length is 1.25m when full extended, rated for hand tools up to 5kgs (Dynamically tested - see 'testing pages' for more info). Rating using a 2:1 safety factor

Individually serialised for clear easy inspection, full traceability and control

Issued with a 'Declaration of Conformity' product certificate and 'Final Inspection' sheet

The Cobra MKII allows direct tool attachment via a Karabiner

Lanyard + holster weight: 0.20kgs (without connectors)

Design, tested and manufactured in the UK for superior finish and quality control

The Cobra MKII is optimised to work with all leading edge tool tethers, belts and holsters

Retractable Tool Lanyard (Cobra MKII + Single Tool Holster)

The Cobra MKII has been designed from conception as a retractable tool lanyard, making it specific for its purpose. It provides flexibility tool reach combined with a reduction in tripping and snagging hazards, with only the required amount of cable extended and exposed. Together the Cobra MKII and single tool holster provide the perfect tool solution system.
