

Tool Belts PRO-Anchor (Belt Buckle)

The tool belt Pro-Anchor (Belt Buckle) tethering arrangement, has been developed for skilled trades workers and technicians where work activities require quick removal or fitting of this anchor to harness Straps / tool belts, without compromising safety or the integrity of the anchorage fixing. Each Pro-Anchor (Belt Buckle) provides a structurally rated single or double 'D' ring configuration to 10kgs (dynamically tested to 20kgs) anchorage for tool tethering. The triple action buckle fastening method provides a visual locked 'position' and audible clear 'snap' when closed appropriately to eliminate operator miss-attachment. The fastening uses a defence grade side release military buckle with an additional safety anti-release extra locking feature making the anchor totally secure.

FEATURES

Simple self-fitting allows easy relocation between harness and belt Straps (Maximum webbing / belt width 50mm)

Overall maximum safe working load of 10kgs (Dynamically tested - see 'testing pages' for more info). Rated using a 2:1 safety factor with either a single (10kgs) or double 'D' ring configuration (5kgs each)

The triple action buckle provides a visual locked 'position' and audible clear 'snap' when closed appropriately to eliminate operator miss-attachment

Manufactured using a defence grade military buckle, premium industrial webbing, and structurally sewn for wear reinforcement and strength

Individually serialised for clear easy inspection, full traceability and control

Issued with a 'Declaration of Conformity' product certificate and 'Final Inspection' sheet

Height: 11cm / Width: 6cm / Weight: 0.04kgs

Manufactured at our product factory in the UK
